**University of Minnesota**
**Residency Position in Veterinary Anatomic Pathology**
**Job ID: 3051199**

The College of Veterinary Medicine is accepting applications for our 3-year training position in Veterinary Anatomic Pathology.

The residency training program is designed to provide broad exposure to basic and applied aspects of veterinary pathology and to prepare the trainee for a career in veterinary pathology and diagnostic medicine.  Residents successfully completing the program are qualified to take the ACVP Board examination.  Pathology residents develop skills in gross pathology and histopathology by participating in a busy diagnostic laboratory service.  These basic pathology skills are supplemented by training in clinical and comparative pathology as well as population based diagnostic medicine.  Residents also participate in pathology teaching for the veterinary student pathology laboratories and instruct senior veterinary students on necropsy rotations. Residents are expected to actively participate in weekly seminars in gross, microscopic, production animal meetings, clinical pathology and other specialty pathology rounds.  A diverse faculty comprised of 12 ACVP certified anatomic or clinical pathologists and 6 production animal diagnosticians support this program.  The caseload includes a wide variety of domestic, wild and exotic animals, birds, and laboratory rodents submitted to the Veterinary Diagnostic Laboratory and the Masonic Cancer Center Comparative Pathology Shared Resource.  The total diagnostic case load is predominantly composed of production animal submissions (swine, bovine and poultry). After completion of the residency program, qualified individuals may pursue focused research training leading to the PhD degree through the institution's NIH-funded T32 post-doctoral training program in Comparative Medicine and Pathology.

Applicants must have a DVM degree or an equivalent degree from a foreign university by the start date (July 1, 2016) and must possess excellent communication skills.  Candidate selection is based on the applicant's academic record, experience, recommendations, and evidence of a commitment to a career in veterinary pathology and diagnostic medicine.  Individuals who have graduated from a non-English speaking veterinary program should provide GRE and TOEFL scores.

The position is annually renewable, with continuation of the appointment being dependent on satisfactory performance and available funding**.**  Starting salary is $32,000, and includes full benefits.

Applicants must apply online: http://z.umn.edu/vetpathres2016 and include a one-page statement of career goals and interests along with a curriculum vitae that includes education, employment history and relevant experience.  In addition, a veterinary school transcript and three letters of recommendation from individuals knowledgeable of academic performance, clinical skills, and pathology experience should be sent to Ms. Anna Jones, College of Veterinary Medicine, 225 Veterinary Medical Center, 1365 Gortner Ave, St. Paul, MN 55108 or e-mailed to bystr005@umn.edu. Additional information about the program is available on the ACVP website.  Applications will be reviewed when received and the search will remain open until the position is filled.
