

Introducing the
complete kit for
oral fluids collection

New!

TEGOTM
swine oral fluids

Population testing and collecting oral fluids samples has never been this easy—or safe

Simple and safe

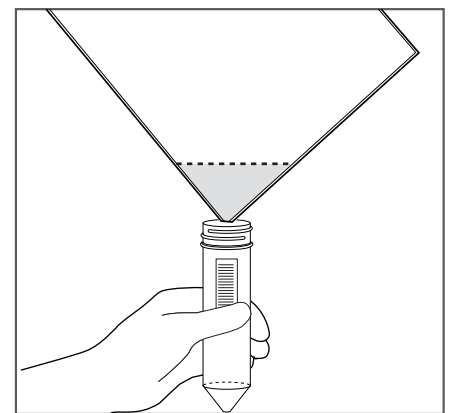

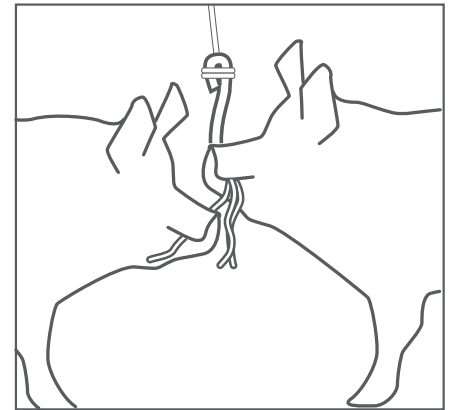

- Oral samples from pen populations are easily collected and tested from one pooled sample
- No need for scissors - specially designed collection bag has convenient tear notch
- Sample tube includes individual barcode label

Compatible with existing lab processes

- Double-pouch bag keeps sample separated from paperwork
- Samples can be tested in the lab without further pooling
- The Oral Fluids Kit can be used for collecting samples for PRRSV and other testing

Cost-effective and convenient

- The all-inclusive Oral Fluids Kit contains all items required to collect samples and prepare them for refrigerated packing and transportation
- Reduced staff resources required to collect and prepare samples for transport
- Please visit www.itlanimalhealthcare.com for more information about using the Oral Fluids Kit for disease testing

TEGO™

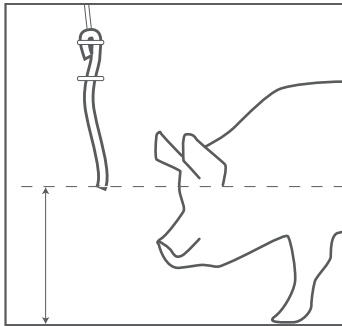

swine oral fluids

Introducing the complete kit for oral fluids collection

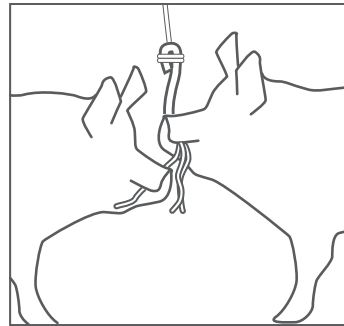

Simplifies the process, reduces the risks

TEGO™ was developed in close consultation with U.S. laboratories, veterinarians and livestock producers worldwide.

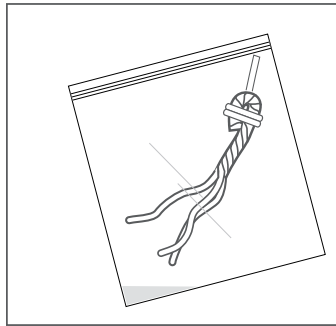

Quick and easy

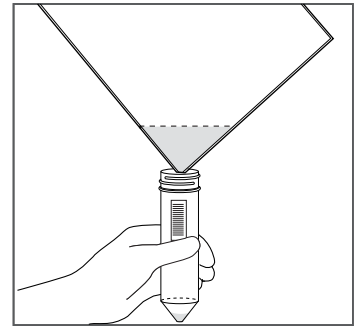

1. Hang rope in pen above the ground at pigs shoulder height. Ensure cord is securely tied.

2. Allow pigs to chew on the rope for 15-30 mins. Wearing first pair of gloves, remove rope from pen and place in large clean single pouch bag.

3. Cut rope from cord used for hanging, and seal the top bag. Squeeze the rope through the bag to extract liquid from the sodden rope.

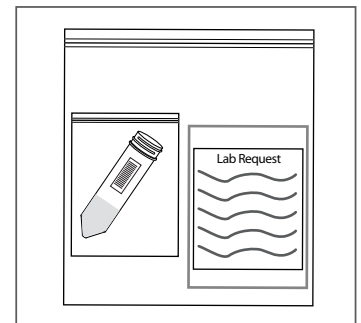

4. Wearing second pair of gloves, tear off corner of bag at perforations. Pour fluid content into sample tube and cover with lid.

Swine Oral Fluids Collection Kit

Product Code	Description	Qty/Pack
A100930	TEGO™ Oral Fluids Kit	1/pack

Latex Free Kit; Bleach Free Rope
Single Use Only

www.itlanimalhealthcare.com

5. Place sample tube in smaller bag and close bag. Now place into the large side of the double pouch bag. Insert the lab request form into the attached pouch. Ship sample tube refrigerated to test lab.

There's security in knowing that you're providing the most advanced care for your animals
